INTRODUCTION

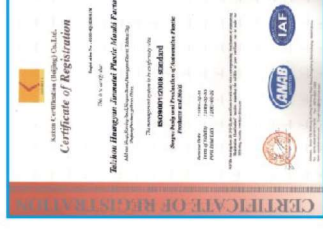

JMT Mould is specialized in designing and making household and home appliance moulds , such as pallets , crates , dustbins , AC , fridge , washing machine etc . From 2002 until now , JMT Mould has achieved lots of great achievements in plastic mould development and manufacturing fields. By now JMT Mould has over two hundred workers, including an outstanding design , project and sales team .

JMT Mould has organized their facility for efficiency by using the latest principles of lean manufacturing. Their capabilities now include prototyping, an injection workshop and a state of the art QC lab and CNC Machining Center. To help realize the benefits of consistent quality systems and business practices , JMT Mould invested time and efforts to be awarded the ISO9001-2008 Quality Certification in May , 2014.

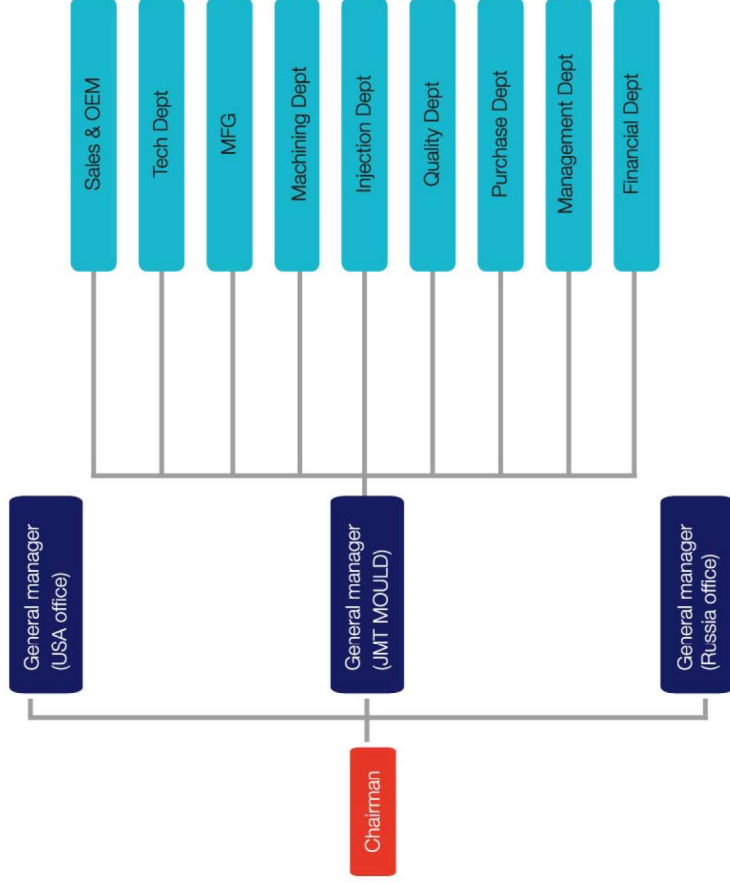

JMT Mould has grown into a superior mould manufacturer with a strong engineering , project , sales team. Engineering work includes not only mould designs, but also mould feasibility, mould flow, product design expertise and prototyping services. These allow the most efficient mould strategies to be developed for our customers.

We have developed great relationships with customers such as SAMSUNG, HOMETECH, GOOD BABY GROUP, by always providing excellent quality and service. We are proud of our culture in continuous improvement and also warmly welcome the customers all over the world to visit our company at anytime.

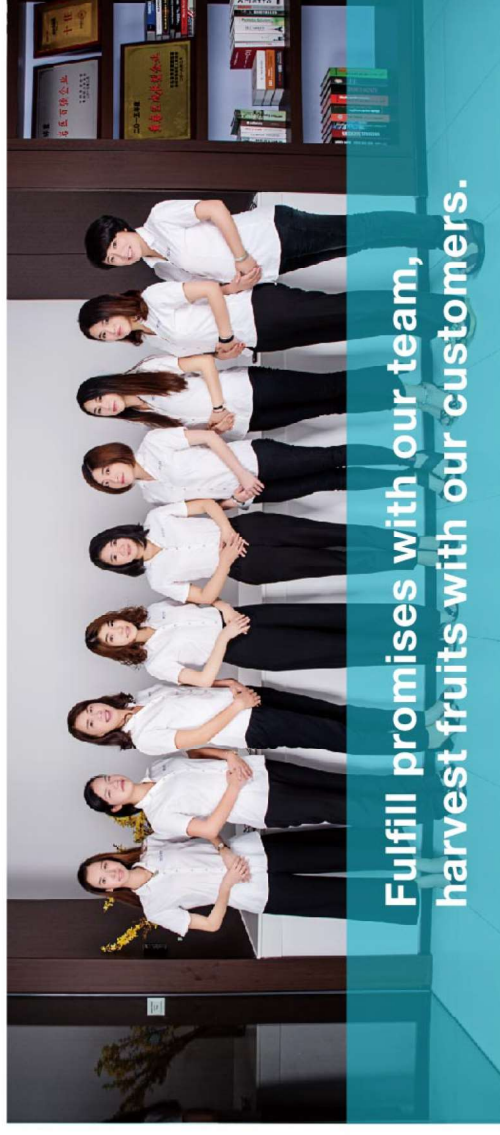

QUALITY IS THE LIFE OF AN ENTERPRISE

ORGANIZATIONAL STRUCTURE

HAPPY FACTORY

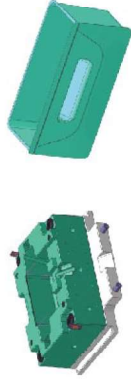

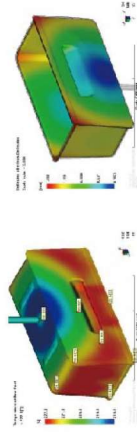

Fulfill promises with our team,
harvest fruits with our customers.

We are committed to creating a real sense of the "JMT Team" with collaboration at our core

DESIGN DEVELOPMENT

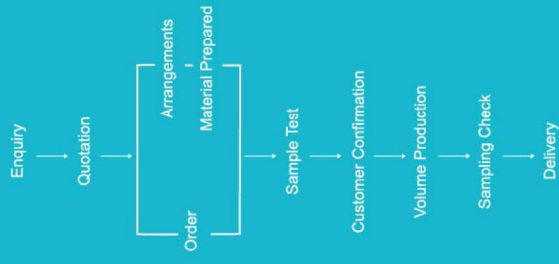

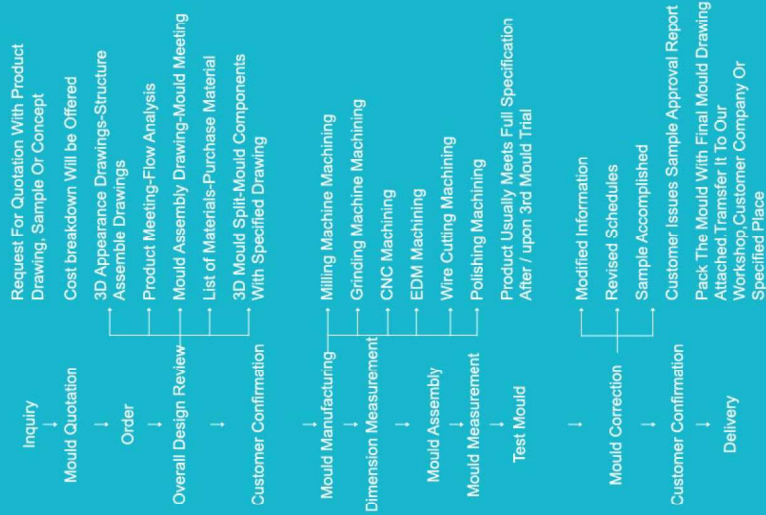

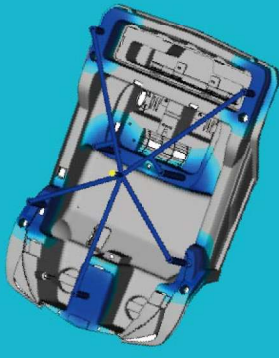

PROJECT ANALYSIS

JMT believes in thoroughly analyzing mold designs before any manufacturing begins. JMT engineers concentrate on mold life, reducing delivery time and ensuring mold quality. Mold feasibility studies are the first step and look for a variety

of issues. Once a mold concept is complete, Moldflow and other CAE (computer aided engineering) tools are used to ensure quality parts can be produced, helping to secure the best value for our customers.

PROJECT ANALYSIS

TEAM

Gather Team Strength, To Provide Strong Technical Support

After years of development, JMT has become a famous brand in mould manufacturing industry, which is entirely due to our unique team spirit. JMT is like a big family, each of which are closely linked. Treat each other with sincerity and show mutual understanding and respect. Therefore, in product development, manufacturing, after-sales service and technical advice we won the trust of customers.

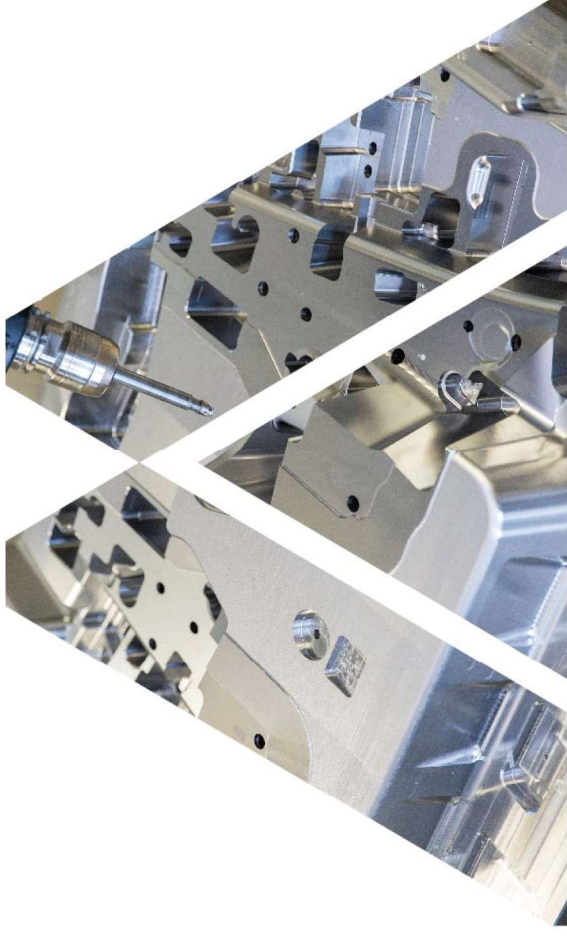

Marketing Department

Open up the international market,
the strategic operation of globalization

Production department discussion group

Precision, the pursuit of nothing
short of perfect

QUALITY

Detail Perfect To Result In High-Quality Goods.

As the Chinese proverb goes, the mechanic who wishes to do his work well must first sharpen his tools. JMT Mould is equipped with a set of advanced processing system and fine machines, like CMM, Grinding, CNC Machines, Low Speed Wire-Cutting Machines, EDM etc. We deeply believe that quality and speed are key elements to win competition. Advanced machines, not only can improve the quality continuously, but also shorten the production cycle and make customers' products more competitive in market.

WORKSHOP EQUIPMENT

Quality Achieve Future

As the Chinese proverb goes, the mechanic who wishes to do his work well must first sharpen his tools. JMT Mould is equipped with a set of advanced processing system and fine machines, like CMM, Grinding, CNC Machines, Low Speed Wire-Cutting Machines, EDM etc. We deeply believe that quality and speed are key elements to win competition. Advanced machines, not only can improve the quality continuously, but also shorten the production cycle and make customers' products more competitive in market.
